 **GARDCO**

# 96 LINE

Philips Gardco offers a remarkable advancement in architectural lighting built around the latest in LED technology – the 96 Line. With an integrated optical system that relies on a single four-watt LED, this minimally scaled luminaire achieves a remarkable level of illumination. In pedestrian thoroughfares, and along stairways, the 96 Line is an exciting design option.

Featuring soft corners, uniform distribution, concealed mounting hardware and consistent visual styling cues, the 96 Line is a smart and practical choice for step and aisle lighting.

The 96 Line was designed to take advantage of LED technology. Designing around the miniature LED source allows for a small, ADA-compliant luminaire, and one that provides the necessary light levels required from a step and aisle product.

## Four incredible watts of illumination

There are two choices of faceplates... a composite injection-molded version with an integral black finish, or die cast aluminum in the 960 and 962 styles. All faceplates are lightly textured and are provided with a UV-resistant, semi-gloss finish in standard, optional or special colors.

The die cast aluminum base and LED optical system are an integrated package. To replace the LED, simply remove the faceplate, and install a new module. Plug and play. Fast, simple, easy does it.

An integrated LED, driver and optic allows the 96 Line to achieve maximum performance from minimal power.

Integral leveling bubble simplifies installation, assuring perfect alignment of each 96 Line steplight.

The 96 Line is UL and CUL listed for Wet Locations.

The 96 Line distributes light forward and away from the luminaire, placing the light on the walkway or interior floor. The 96 Line mounts 18" to 24" above grade, making it ideal for both interior and exterior applications. The graphic to the left illustrates the pattern of light achieved at the 18" mounting height.

Subtle downlight wall washing with wide and uniform distribution are noteworthy characteristics of the 96 Line.

# 96 LINE Ordering

Example	PREFIX	MOUNTING	WATTAGE	VOLTAGE	FINISH
	961C	S	4	UNIV	BLP
